ABOUT ME

Skill stack:

AWS, GCP, Kubernetes, Docker, CI/CD (Gitlab, Jenkins, Spinnaker), Terraform, Git, Linux, scripting/automation, monitoring (Datadog, Grafana/Prometheus, ELK), Kafka, DBA, programming basics (Python, Java, GO, Bash).

About me:

I'm a certified Senior DevOps Engineer with years of experience in complex tasks such as production database migrations, rolling out new kubernetes environments and clusters, redesigning and rebuilding CI/CD systems, creating from scratch incident management and monitoring solutions, maintaining huge IaC scripts and other. I'm stress-resistant, calm minded, very attentive to details, fast-learner. I'm using my critical thinking and technical skills to prevent issues before customers face them. I'm a permanent solution person and always think about the side effects of my work. I'm a perfectionist so I won't stop before it gets perfect (means never). In my spare time I'm usually travelling, cycling and playing volleyball.

2023 goals:

AWS certification, B2B (contract) employment, remote role, python advanced.

WORK EXPERIENCE

01/05/2022 – CURRENT Tallinn, Estonia

Senior DevOps Engineer Wallester AS

I'm responsible for entire infrastructure and DevOps department establishment - coordinating several engineers together, integrating newcomers, setting up all new processes, proactively pushing DevOps Best Practices (automation, observability, CI/CD, GitOps), strategic infrastructure improvements, working with PCI-DSS certified systems, huge database migrations, cluster upgrades, monitoring system refactoring and other.

02/12/2019 – 30/04/2022 Tallinn, Estonia

DevOps Engineer Breakwater Technology OÜ

I am a member of an agile software development team. My primary focus is create, configure, and maintain CI/CD pipelines, environments and tools, 3rd line support (help first and second with technical questions and investigations), monitor the production and non-production environments to identify bottlenecks and proactive solutions for improvements, automate business processes. I'm in contact with third-party providers in order to solve problems also reporting bugs and improvements to product owner and development team. I participate in sprint planning, task estimation, testing, bug reporting, deploying software, improving the development and release process together with the development team.

Address Tallinn, Estonia

25/03/2019 – 29/11/2019

Application/System Engineer Kühne + Nagel IT Service Centre AS

I provide 2nd line expertise and technical support for enterprise IT applications. It's required to know Linux, Java, SQL, Oracle DB, Logs, basics of logistics and more to perform my daily tasks. I also attend internal Java school provided by employer. B2B support mainly.

Address Tallinn, Estonia
