ABOUT ME

Skill stack:

Cloud (AWS, GCP), Containers (Kubernetes, Docker, Helm), IaC (Terraform, CloudFormation, YAML), CI/CD (AWS DevTools, GitLab, Jenkins, Spinnaker), Automation (Bash scripting, Python, Ansible, Lambda), DBA (PostgreSQL, RDS, MySQL, Redis), Networking (ELB, Firewalls, Ingress, Service Mesh), Monitoring (Grafana, Prometheus, ELK, Datadog), SecOps (vulnerability scanning, secret management, AWS GuardDuty, AWS Inspector, IAM, RBAC), GitOps (Git, GitHub, Bitbucket), DataOps (Kafka, Kinesis, Firehose, SQS), FinOps (Cost Optimization, Saving Plans, Reserved Instances), AI (ChatGPT).

About me:

I'm a DevOps Engineer with 5+ years of experience including Tech Lead and Team Lead positions. Overall in IT for 10+ years. Worked in FinTech and Gambling industries. My daily duties include complex tasks such as solutions architecture, PCI-DSS compliance, production database migrations, provisioning new Kubernetes environments and clusters, redesigning and rebuilding CI/CD systems, creating monitoring solutions, maintaining huge IaC scripts, pushing DevOps best practices to the team, strategic roadmap planning, mentoring and other. I'm stress-resistant, calm minded, very attentive to details, fast-learner. I'm using my critical thinking and technical skills to prevent issues before client might even face it. Languages spoken - English C1, Lithuanian C2, Russian C2.
